- Download of attachments with suspected sensitive data
- Mailbox content in HTML format
- Scheduled search profiles

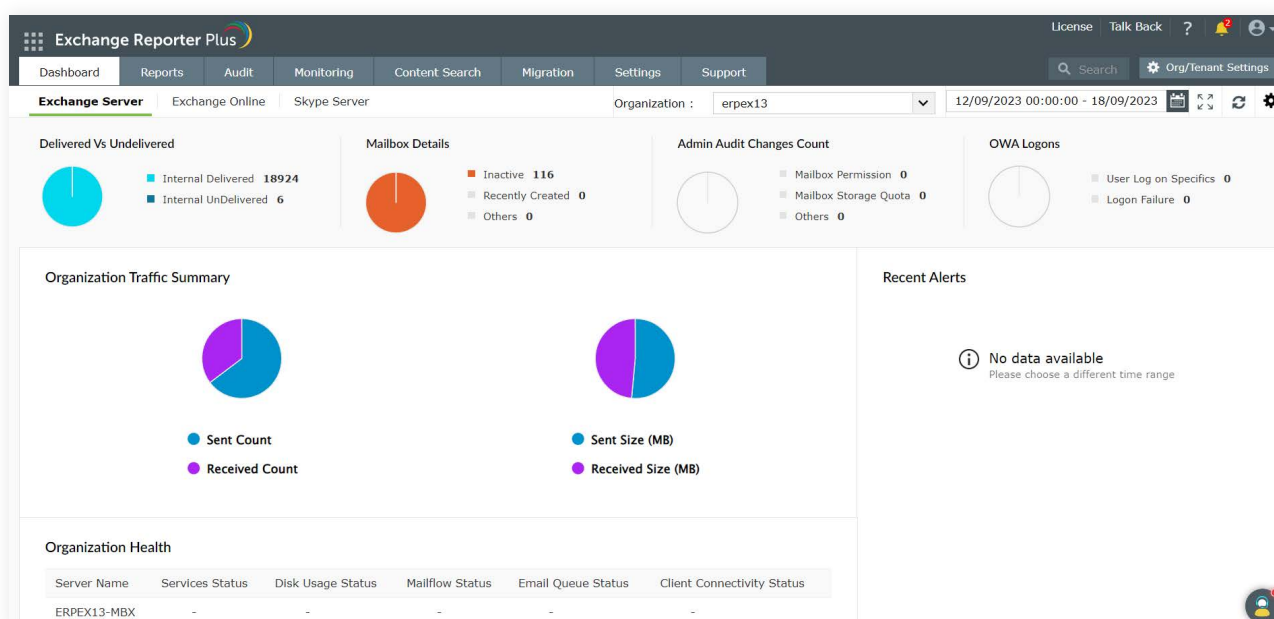

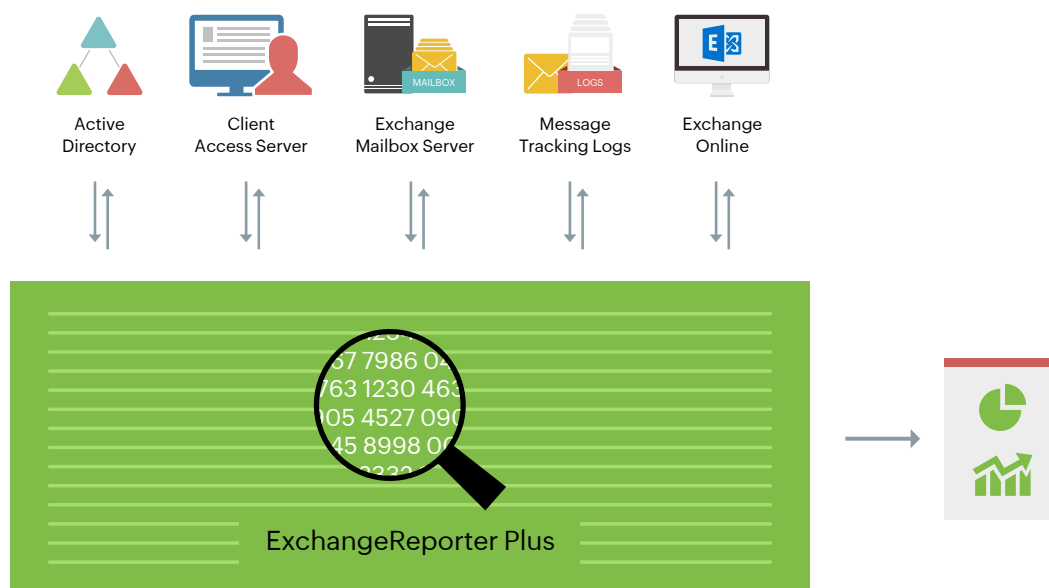

Exchange migration

Easily migrate from Exchange Server to Exchange Online

- Migrate existing users
- Provision new users
- Migration filters
- Mailbox mapping
- Migration scheduling

How does Exchange Reporter Plus work?

Exchange Reporter Plus scours message tracking logs, Outlook Web Access (IIS) logs, and other sources of information in Exchange Server, Exchange Online, Active Directory, and Skype for Business servers to collect data through scheduled tasks. When a user runs a report in Exchange Reporter Plus, the relevant information is fetched from the data stored in the product databases and presented neatly in the form of tables and graphs.

Why Exchange Reporter Plus?

- **All-inclusive dashboard**

Quickly grab a summary of the statuses of various objects in your Exchange environment using the dashboard displaying information in graphs and charts.

- **Easy deployment**

Deployment is simple, easy, and takes just minutes. Licensing is based on the number of mailboxes and it is also flexible.

- **Instant alert**

Configure alerts and receive notifications via SMS or email for events that require your immediate attention.

- **Filters**

Narrow your search using various filters such as event dates, business hours, email details, and more to find the data you need quickly.

- **Handy reporting options**

Create custom reports. Export generated reports in four formats: CSV, PDF, XLS, and HTML. Schedule reports to receive regular updates.

- **Instant mailbox content searches**

Perform instant mailbox searches and view content in HTML format. Directly download the attachments that you would like to check.

- **Exchange migration**

Effortlessly streamline the migration of emails, contacts, tasks, and calendars from Exchange Server to Exchange Online.

Reports spotlight

Top 10 Exchange reports available in Exchange Reporter Plus:

- Permissions assigned to each mailbox
- Hidden mailboxes
- ActiveSync mail requests
- Mail traffic summary
- Distribution list members
- Logon by users
- Mailbox features
- Mail sent to and received from specific domains
- Mailbox database and size growth
- Non-owner mailbox activities

“

We needed granular reporting on Exchange to get a better understanding of the environment itself, so that we could begin to change various projects for this core service use.

Exchange Reporter Plus gave all this—without having to depend on PowerShell scripting.

Shannon Rubin,

Institute for Building Technology and Safety (IBTS)

“

Finding out mailbox sizes was very cumbersome and difficult. Exchange Reporter Plus was the only solution that gave us mailbox size and group information within our budget.

Renee Davis,

Chief information officer at Life Management Center, Florida
